27. <b>KIPI</b>	Kenya Industrial Property Institute		

## THE 2023 KENYA NATIONAL EXPORT MARKET DEVELOPMENT PROGRAMME (KNEMDP)

The Kenya Export Promotion and Branding Agency is mandated to facilitate market access for Kenyan exports and within the same efforts, seeking to support enterprises to access markets that portends good returns. There are opportunities in the global markets that seeks attention through well-coordinated marketing programmes that aim at increasing both value of exports and market share.

Guided by the structured approach to export market prioritization framework, the Kenya Export Promotion and Branding Agency (KEPROBA) identifies export market opportunities for Kenyan goods and services through market studies, investigations, scoping missions, market intelligence as well as profiling of target markets with a view to formulating appropriate market entry and penetration strategies. The implementation of identified trade promotion activities is a collective effort by the stakeholders, including our Embassies and Missions abroad where most of these activities are held.

KEPROBA annually develops this calendar of all promotional events, to guides its export market development activities. The processes for developing this KEMDP has been consultative one involving both public and private sector stakeholders who submit their activities to the Agency for collation and analysis in line with our goals of consolidating and enlarging our traditional export markets of East African Community (EAC), Common Market for Eastern and Southern Africa (COMESA) and European Union (EU) as well as diversifying into new and emerging export markets

of Eastern Europe, North America, Gulf Region, Asia, and the Rest of Africa. KEMDP has traditionally been developed around the Calendar year.

Additionally; activities with strong weights as well as considering the competing interests in the operations of our enterprises; the promotion activities in this programme have been scheduled to space the relevant activities including market research/ surveys, trade missions, contact promotion programmes, buyer/ seller meetings, solo exhibitions, trade fairs and exhibitions and inward buying Missions respectively.

Besides this being an export orientated program, it is noted that majority of Kenyan exporters, who comprise of the Small and medium sized bracket, are mostly manufacturing products being marketed for the local and regional markets. Initiatives within the government have been taken with an aim of enhancing productivity and diversity within the manufacturing sector to enable Kenyan exports to be competitive in local, regional, and international markets. Some of these initiatives include increasing productivity, improving quality in production, building capacity and competitiveness through design, product development, packaging and labelling, standardization, and protection of innovations. With these considerations, it has been deemed necessary that stakeholders organize and implement local events to cater for local companies willing to benchmark with their international counterparts invited to these Events. These have been included under the Kenya section of the program.

## THE 2023 KENYA NATIONAL EXPORT MARKET DEVELOPMENT PROGRAMME (KNEMDP)
